

Jon H. Decker, AIA
Principal

Education Bachelor of Architecture
University of Washington, 1964

Summary Jon H. Decker has been Principal-in-Charge for the firm's numerous healthcare projects, which include research, teaching and clinical facilities for more than 28 years. As founder of Decker Architects in 1971, he has maintained, on each project, continuous involvement from early planning/programming phases through to construction. Mr. Decker's experience in programming, planning and design has resulted in a specialized expertise for the firm in the healthcare field of architecture.
